EDUCATION

B.Tech in Artificial Intelligence — **Vidya Jyothi Institute of Technology, Hyderabad** *2022 – 2026*
CGPA: 8.59

WORK EXPERIENCE

AI & Automations Intern — **Tericsoft Technology Solutions, Hyderabad** *Feb 2026 – July 2026*

- Built an AI assistant for the CTO that connects engineering data from GitHub, Jira, Keka HR, WhatsApp, and 35 BigQuery tables, making project and team insights accessible through natural-language queries.
- Redesigned the assistant's retrieval system, cutting response times from **15–20 seconds to 2–3 seconds** while reducing AI inference costs.
- Independently built an end-to-end **n8n SEO automation workflow** that researches competitor pages, identifies and evaluates keywords, generates an editable blog checklist for human review, and produces blog content after approval.
- Integrated multiple LLMs, voice AI platforms, APIs, and business tools to automate workflows across internal operations and client-facing projects.

Forward Deployed Engineer Intern — **Altaric Consulting, Hyderabad** *August 2026 – Present*

- Part of the **founding team** building a **social discovery app** that helps people relocating to new cities or countries make friends, discover like-minded people, and find companions for local activities.
- Contributing to **product development** and **technical implementation**, building features that help users discover people nearby, connect over shared interests, and turn online interactions into real-world friendships.

PROJECTS

AI-Powered Engineering Team Analytics Platform *Internship · Tericsoft*

- Built an **LLM Wiki–powered AI assistant** for the **CTO** that consolidated engineering knowledge from GitHub, Jira, Keka HR, WhatsApp, and 35 BigQuery tables into a structured, searchable knowledge base for project- and employee-level insights.
- Re-architected the solution from a four-model agentic RAG pipeline to an **LLM Wiki** indexing approach, reducing AI inference costs and cutting response times from **15–20 seconds to 2–3 seconds** while maintaining accurate retrieval across enterprise data.

Autonomous SEO Blog Research & Content Writing Pipeline *Internship · Tericsoft*

- **Independently designed and built** an end-to-end **n8n workflow** that analyzes **competitor pages, extracts target keywords**, and uses them to **discover and evaluate** additional keyword opportunities.
- **Automated** keyword shortlisting and SEO blog checklist generation, with a **human-in-the-loop** review process that lets users refine and approve the checklist before **content generation**.
- **Integrated** LLaMA 3.1 8B, GPT-4.1 mini, and GPT-4.1 across research, content planning, and blog writing, with iterative refinement based on **user feedback**.
- **Reduced** a multi-hour manual SEO research and content planning process to minutes by automating competitor analysis, keyword research, and blog generation.

AI Voice Agents — Appointment Booking & Outbound Follow-Ups *ElevenLabs · Make.com · Cal.com*

- **Built** a **conversational booking agent** that checks live **Cal.com availability**, collects and **verbally confirms patient details**, and **books appointments** with **no clinic staff involved.**
- **Built** a **dealership follow-up agent** triggered by new Google Sheets rows, placing **personalised outbound calls** that run a structured 3-question **satisfaction survey**.
- **Auto-logged every call transcript**, AI-generated summary, duration, and recording URL back to **Google Sheets for review**.

Thyroid Cancer Detection — Bilinear CNN *Published Research Paper - ICICC-2025, Springer LNNS*

- **Built a system for Thyroid cancer detection - Dual VGG16 bilinear CNN** for TIRADS-based ultrasound nodule classification; XML-based ROI extraction and augmentation. **Published in Springer LNNS (ISSN 2367-3389).**

SKILLS

Languages & Frameworks: Python, Java, C, SQL, FastAPI, Streamlit, REST APIs, Git, GitHub, Webhooks, JSON, Pydantic
Generative AI & LLMs: LangChain, LLM APIs (OpenAI, Google Gemini, Anthropic Claude), RAG, Chatbots, LightRAG, Prompt Engineering, Function Calling, Tool Calling, Structured Outputs, Embeddings, FAISS, SentenceTransformers, Vector Search, LLM Evaluation
Machine Learning & Deep Learning : Scikit-learn, Supervised Learning, Unsupervised Learning, Classification, Regression, Feature Engineering, Data Preprocessing, Model Training & Evaluation, PyTorch, TensorFlow, Keras, CNNs, Transfer Learning
Agentic AI & Automation: n8n, Make.com, AI Agents, Agentic Workflows, Multi-Agent Systems, Workflow Orchestration, MCP, ElevenLabs Voice AI, Conversational AI, Voice Agents, Twilio, Webhooks, API Integrations, Claude Code, Cursor, Process Automation
Data & Cloud: MySQL, AWS, GCP, Azure ML , Google BigQuery, Vector Databases, Pandas, NumPy, Power BI, Data Integration, Data Transformation, ETL, Data Pipelines

CERTIFICATIONS

- **Anthropic Academy:** Completed the full course catalog, **covering Claude API, Model Context Protocol (MCP), Claude Code, Agent Skills, and AI Fluency**, with hands-on learning across **Claude's AI development tools and capabilities**.
- Earned certifications from **AWS Academy** in **Generative AI and Machine Learning Foundations** and **Cisco Networking Academy** in **Python and C Programming**.
